Funny Faces

Author: Dr Mark Norman
ISBN: 9781922179968
ARRP: $16.95
NZRRP: $18.99
June 2014

Outline:

The faces of some animals may look funny to us but their eyes, ears, noses and mouths are exactly what those animals need to survive. Find out “Why the funny face?”

Author Information:

Dr Norman is Head of Sciences at Museum Victoria where he leads the large and active natural sciences research team. For his own research he studies octopuses, squids, cuttlefishes and nautiluses (the cephalopods). He is also a trained teacher, an educational display designer and an experienced underwater cinematographer. His research and projects with documentary makers including BBC, National Geographic and Discovery Channel has covered giant squid, poisonous blue-ringed octopuses, huge aggregations of southern giant cuttlefish and diving surveys of remote Indo-Pacific coral reefs.

How to use these notes:

This story works on many levels. The suggested activities are therefore for a wide age and ability range. Please select accordingly.

Themes/Ideas:
- Animals/Biology/Natural science
- Adaptation
- Survival
- Environment

Discussion Questions and Activities

English

View the cover and title. Identify the following:
- The title of the book
- The author
- The publisher

From the front and back cover what information can you learn about the book? What do you think this book is about? What type of book is this and where would you expect to find it in your library?

Identify the following features of this book:
- Title page
- Page numbers
- Glossary
- Index

How do these features help to make this book easy to read?

What is the purpose of Funny Faces? Is it telling a story or giving information? How can you tell?

What animal do you find most interesting in Funny Faces? Write or tell the class what you like or find interesting about it.

How do you think this book would be different if there were no pictures? What about if there were no words?

A glossary is a collection of words from the book that lists their definitions. Turn to page 32 to view the glossary for Funny Faces. Are there any extra words in the book that aren’t in the glossary that you don’t know the meaning of? List these words then research their meaning or ask the class if anyone knows.

In what order is a glossary set out? How does this help when using it?

This book was written by Dr Mark Norman, a marine biologist. How do you think he found the information to write this book?

Compare this book to a storybook you have in your classroom. What is different about them? Imagine your teacher asked you to research an animal, how would a book like Funny Faces be useful?

List five ways you could find more information on any of the animals in Funny Faces.

Write and illustrate an imaginative story about one of the animals from the book using its ability that is described (for example, a story about a tarsier hunting spiders at night or a male moth smelling a female moth’s perfume). Re-read your own story to check for errors and then swap with another classmate and check each other’s work. Type your finished story in a word processor and scan your illustrations.

If you could have any of the facial features mentioned in Funny Faces, which one would you choose? Write a creative story about what would happen if you developed a funny face.

Science

As a class, pick several animals from the book and discuss what their “funny face” is used for (for example, a cuttle fish’s tentacles are used for grabbing, a walrus’s teeth are used for movement, etc.). Make lists of each group.

Certain animals have features that are designed especially for their habitat. Why do you think these animals have developed like this? Do you think these animals could survive if they are moved away from their natural habitat (for example, could a stick insect or cicada live where there are no trees?) Why do you think that?

As a class, read out the list below and discuss what is the purpose of each animal’s funny face.
- A dog’s nose
- A cat’s whiskers
- A bumble bee’s eyes
- A python’s forked tongue
- A goldfish’s gills

Some of the animals in Funny Faces are very good at camouflaging themselves. Draw a design of how you would camouflage yourself in the bush or in your school playground. Be creative but only use items that you would normally find in the bush/around your school.
